Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 11 drawn to a DNA containing an uncoupling protein-2 (UCP-2) promoter region containing the regulator sequence, vectors comprising the DNA and a transformed host cell comprising the DNA, and a kit and method for screening for a compound or its salt that inhibits or promotes UCP-2 promoter activity.

Group II, claim(s) 9, drawn to a method of screening for a compound that promotes or inhibits heat production.

Group III, claim(s) 10, drawn to a method of screening for an antiobestic drug.

Group IV, claim(s) 10, drawn to a method of screening for an antidiabetic drug.

Group V, claim(s) 10, drawn to a method of screening for a depressor.

Group VI, claim(s) 10, drawn to a method of screening for an antihyperlipemic drug.

Group VII, claim(s) 10, drawn to a method of screening for an antipyretic drug.

Group VIII, claim(s) 12 and 14, drawn to a compound that promotes or inhibits UCP-2 promoter activity and a pharmaceutical composition comprising the compound.

Group IX, claim(s) 13, drawn to a compound that promotes or inhibits heat production.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the nucleic acid of Group I is the sequence/structural characteristics of the claimed DNA that allow it to function as

a promoter. Groups II-VII comprise special technical features that are not necessarily present in the method of Group I. The special technical features for Groups VIII and IX are the structural/functional characteristics of the different compounds. These structural/functional characteristics are not present in the compositions of Group I.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
